World's highest resolution realistic 3D model on a city scale

SMART3D Features:

- 2-3cm per pixel 3D model viewer, available on any standard internet browser.
- Access from any device at any time.
- Various cloud installation options; on premises or by Simplex cloud.
- Apply various GIS easy to use tools: measurements, snapshots, line of sight and viewshed analysis.

- Integrate GIS layers on the 3D model.
- Upload 3D building models from the user side.
- Track GPS from different units on the 3D map.
- Live video feed integration.
- Integrate various sensor data streams with live notifications.
- Compare different time collections and analyze for discrepancies.
- API for third party systems.

Industries we serve:

- Urban Planning- Architecture, Engineering, Building construction and Real Estate.
- Telecom 5G Planning and IOT.
- HLS, Defence and First Responder Forces.
- Disaster Management and Insurance Analysis.
- Electric, Water and Gas Utilities.
- Infrastructure, Roads and Highways.
- Tourism, Media and Entertainment.
